## P R O F I L E

Hello! I'm Clementino, a focused and dedicated Full-Stack Developer. I am passionate about solving problems, learning new technologies and mastering the ones I already know: JavaScript, React, Redux, HTML5, CSS, Node.js, Express, Sequelize and PostgreSQL and MongoDB as a database. If you are interested, please contact me!

## E D U C A T I O N

- **FULL STACK DEVELOPER**  
Henry - Buenos Aires, Argentina  
2021 - 2022
- **ENGLISH COURSE**  
Institute Josefina Conte - Corrientes, Argentina  
2019 - 2020

- Css
- PostgreSQL
- Sass
- React
- JavaScript
- MongoDB

## E X P E R I E N C E

### ● Tres Bien(Ecommerce) →

October 2022 | Full-Stack

Development of an e-commerce of clothing products, using as main technologies: ■ Front-end: Javascript, React-Redux, Material MUI ■ Back-end: TypeScript, Express, Node.js, Mongoose. ■ Additional technologies: Nodemailer, Cloudinary, Auth0, Mercado Pago checkout, Stripe and PayPal. The remote work team was made up of 8 collaborators from Argentina, Mexico and Venezuela using scrum as an agile methodology and git/github as version control. Main functionalities of the project: search, filtering and ordering of products, pagination, user login, administration dashboard, shopping cart, favorites, payment with mercadoPago, purchase history, product scoring, notifications and stock management by size or number shoe.

### ● Countries of the world →

September 2022 | Full-Stack

I worked on the development of an APP using React for the Front-End and Redux as state management. The APP initially consumes data from an API through a Back-End developed in Node.JS using Express, adding new features to the original API, then saves it in the PostgreSQL database and uses it from there. The APP has a search option, ordering and filters, in addition to a controlled form for the creation of new entities.
